Dr.-Ing. Syed R. Ahmed is divisional head in the Institute of Design Aerodynamics, German Aeronautical and Space Research Establishment (DLR), Braunschweig, Federal Republic of Germany. He received a Dipl.-Ing. Degree in 1964, followed in 1970 by a Dr.-Ing. degree in fluid mechanics from the Technical University at Braunschweig. Since 1975 he has been actively engaged in theoretical and experimental study of vehicle aerodynamics.

Dipl.-Ing. Hans-Joachim Emmelman studied mechanical and aircraft engineering at the Technical University, Darmstadt, Federal Republic of Germany. From 1970 to 1978 he was test engineer and assistant department head in the climatic wind tunnel of Volkswagen AG. Since 1979 he has been an assistant staff engineer, aerodynamics, at Adam Opel AG.

Dr.-Ing. Klaus-Dieter Emmenthal studied mechanical engineering at the Technical University, Braunschweig. He then worked for nine years at the German Aerospace Authority as research engineer. Since 1970 he has been with Volkswagen AG and is currently department manager responsible for engine and accessories research. He obtained his doctorate at the Technical University, Aachen, Federal Republic of Germany.

Dipl.-Ing. Helmut Flegl studied mechanical engineering at the Technical University, Munich. In 1966 he began work at the Dr.-Ing.h.c. F. Porsche AG. As test engineer he was responsible for the design of many successful racing cars. He is currently director of research at Porsche's R&D Centre, Weissach, Federal Republic of Germany.

Dr.-Ing. Werner Gengenbach studied mechanical engineering at the Technical University, Karlsruhe, from 1954 to 1959. He obtained his doctorate in 1967 for his thesis on 'Behaviour of car tyres on dry and especially wet pavement'. Since 1971 he has worked for Audi AG, Ingolstadt, Federal Republic of Germany, first as manager for testing heating, air conditioning and cooling systems; and since 1980 as manager of quality analysis.

Dipl.-Ing. Hans Götz is manager of body development at Daimler-Benz in Sindelfingen, Federal Republic of Germany. He studied mechanical

engineering at the Technical University, Stuttgart. After a period as a research engineer on air conditioning, he joined Daimler-Benz in 1961. He has been involved in aerodynamics, safety, vibration and acoustic technologies.

Dr.-Ing. Wolf-Heinrich Hucho studied mechanical engineering at the Technical University, Braunschweig. From 1961 to 1968 he was assistant to Professor Schlichting. For 11 years he worked for Volkswagen AG, first as head of the wind tunnel department, later as departmental manager, engine research and fluid dynamics. Since 1979 he has held positions as director of Research & Development and general manager in the German automobile supply industry.

Prof. Dr.-Ing. Dietrich Hummel, Institute for Fluid Mechanics of the Technical University, Braunschweig, Federal Republic of Germany, studied mechanical engineering at the Technical Universities in Stuttgart and Braunschweig. As assistant to Professor Schlichting in 1968 he obtained his doctorate, and in 1972 he qualified as lecturer in fluid mechanics and aircraft aerodynamics. His special interests are separated flows and bird flight.

Dr.-Ing. Görgün A. Necati studied mechanical engineering at the Technical University, Istanbul, Turkey. His postgraduate studies were at the Technical University, Hanover, Federal Republic of Germany. Since 1969 he has worked in the R&D section of Ford-Werke, Cologne, Federal Republic of Germany. Major activity fields: wind tunnel and road testing, dynamics, aerodynamics and acoustics of motor vehicles.

Dipl.-Ing. Raimund Piatek studied mechanical engineering, especially fluid mechanics, at the University of Bochum, Federal Republic of Germany. Since 1978 he has been employed by Volkswagen AG as research engineer in the climatic wind tunnel department.

Dipl.-Ing. Michael Rauser studied aeronautics and astronautics at the University of Stuttgart and is presently supervisor of aerodynamics, vehicle research, at the Dr.-Ing.h.c.F.Porsche AG, R&D Centre, Weissach, Federal Republic of Germany.
